

React FullStack Developer

Role Purpose

The React Developer will help in the implementation of further digitalization of the company and its projects. Being part of a small team, Front-End and Back-end Developer will contribute in designing and implementing Prudential's web applications, using mainly React.js and mobile applications using Flutter.

Key Accountabilities

- Collaborate with Prudential business and product teams to develop digital initiatives
- Contribute in the design and development phases of the different digital products.
- Implementation of web and mobile apps.
- Communication with clients and daily customer service.

Core Competencies, Knowledge and Experience

- BSc in Computer Science, Software Engineering or relevant field
- Excellent competence in HTML5, CSS3, JavaScript
- In-depth knowledge of React.js framework (knowledge about React frameworks, such as NextJS and/or Remix will be considered a plus)
- Implementing apps with a custom and responsive UI
- Good understanding on Node.js
- Flutter (knowledge of React Native and/or Xamarin will also be considered)
- Work with SQL & NoSQL databases
- Python

Professional Qualifications

- Working experience in agile environments/teams will be highly appreciated
- Work effectively in a fast moving and demanding multi-project environment
- Excellent communication skills in English (written and verbal)
- Self-motivated
- Fulfilled military services (for male candidates)

Remuneration Package

- Competitive salary, according to former experience
- Exceptional Private Health & Medical Insurance Benefits
- Mobile
- Laptop
- Bonus connected with Department PnL and productivity
